

## **Mannix College**

### **Non-Monash University Students Internet Connection**

#### **Registration**

Mannix College student residents who are not enrolled at Monash University are required to complete the **Application for Registration for Internet Access for Non-Monash Students** overleaf. The Mannix College office then puts the request to Monash University ITS.

Once registration is confirmed, the student is advised with a notice left in their pigeonhole. The student must then follow the steps indicated on the notice to obtain their "Authcate Username and password". Access to the Internet will then be possible from the Mannix Computer Lab.

The registration is only valid during that academic year in which it is provided. That is, registration is required to be renewed each year.

#### **Registering a Personal Computer**

Registering a personal computer on the network is the same as for other student residents. The connection information sheet is available from the front office.

#### **Usage Fees**

All residents and guest must pay the College for their internet usage. Guests are required to deposit \$5 on their internet account before receiving their internet connection ID.
